Unicam Part-Maker

360 Deg | Drill | Machine | Tap | Part-Off

Replacable Chucks for each Profile |
4500 mm extrusion length | Multi
Spindle or Automatic Tool Changer

Unicam's answer to a small production environment. This machine can make all your small parts such as hinges, brackets, Clamps, Lugs... The alumium extrusion is inserted into the machine, and setup to be flush with the chuck. Then you press the start button, and it takes over.

The material is fed forward and the end cut off so that we know it is square. Then the machining operations start, drilling, milling and tapping. The machine can work at any angle When it is finished the material moves into the correct position and the saw blade cuts the finished part off of the material.

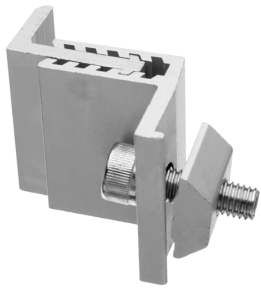

When the profile reaches its end the machine will stop so that a new profile can be loaded. Designed to complete the job in one operation.

See website for details.

SPECIFICATIONS

Max Material Size:	4300 x 75 x 75 mm
Securing System:	Rotary Clamps / Chucks
Main Spindle:	3.3 KW
Spindle Max RPM:	18000
Spindle Type:	MTC / ATC
Spindle Cooling:	Air Cooled
Saw Diameter:	500 mm
Tool Station:	8 Tool Linear
Tool Probe:	Yes
Servo Motors:	750 w
Axes:	6
Max Feed Rate:	15 M/Min
Max Cutting Rate:	15 M/Min
Tool Cooling:	Flood Cooling
Frame Material:	Epoxy Coated Mild Steel
Power:	380v 3PH 15 A
Compressed Air:	6-8 Bar
