Uni-Grip Machining Centre

Vacuum Pods | Clamping | 1800 x
4500 mm | Automatic Tool Changer

Unicam's wood and composite board machining center. Designed for Solid wood, Panels and Jig work. This machine can cut on 5 faces of a board using an ATC with aggregate heads or a Bi-Rotary spindle. Different sizes & options available.

The vacuum pods are adjustable in the machine direction and the cross bars that hold them are adjustable along the length of the machine. This allows you to setup the vacuum to hold any size board that can fit on the table.

There are other attachments that can be mounted on the cross bars, such as clamps, vises and jigs.
